Ethics of Terrorism & Counter-Terrorism Georg Meggle 2013-05-02 We are supposed to wage war against Terrorism - but exactly what we are fighting against in this war, there is nearly no consensus about. And, much worse, nearly nobody cares about this conceptual disaster - the main thing being, whether or not you are taking sides with the good guys. This volume is an analytical attempt to end this disaster. What is Terrorism? Are terrorist acts to be defined exclusively on the basis of the characteristics of the respective actions? Or should we restrict such actions to acts performed by non-state organisations? And, most important, is terrorism already by its very nature to be morally condemned? But, having a clear idea of what Terrorism is, would be only the beginning. Rational moral assessment still needs two further components: The relevant facts; and the relevant values and norms. Now, in a field where systematic disinformation has been even proclaimed to be the official policy, facts are obviously very hard to get at. This volume is mainly interested in Ethics: What's wrong with Terrorism? And what is morally right or morally wrong, respectively, with all the different means of Counter-Terrorism? What are the moral boundaries for waging war against terrorism? What are the right ways of dealing with terrorists? And what about the alleged anti-terrorism wars on Afghanistan and Iraq? With contributions from Marcelo Dascal, Tomis Kapitan, Daniel Messelken, Seumas Miller, Olaf L. Mueller, Igor Primoratz, Charles P. Webel, Per Buhn, Rüdiger Bittner, C. A. J. Medical Anthropology Andrea S. Wiley 2009 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond

a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Human Rights in the Digital Age Mathias Klang 2004-12-23 The digital age began in 1939 with the construction of the first digital computer. In the sixty-five years that have followed, the influence of digitisation on our everyday lives has grown steadily and today digital technology has a greater influence on our lives than at any time since its development. This book examines the role played by digital technology in both the exercise and suppression of human rights. The global digital environment has allowed us to reinterpret the concept of universal human rights. Discourse on human rights need no longer be limited by national or cultural boundaries and individuals have the ability to create new forms in which to exercise their rights or even to bypass national limitations to rights. The defence of such rights is meanwhile under constant assault by the newfound ability of states to both suppress and control individual rights through the application of these same digital technologies. This book gathers together an international group of experts working within this rapidly developing area of law and technology and focuses their attention on the specific interaction between human rights and digital technology. This is the first work to explore the challenges brought about by digital technology to fundamental freedoms such as privacy, freedom of expression, access, assembly and dignity. It is essential reading for anyone who fears digital technology will lead to the 'Big Brother' state.

Philosophical Reflections on Disability D. Christopher Ralston 2009-09-19 This project draws together the diverse strands of the debate regarding disability in a way never before combined in a single volume. After providing a representative sampling of competing philosophical approaches to the conceptualization of disability as such, the volume goes on to address such themes as the complex interplay between disability and quality of life, questions of social justice as it relates to disability, and the personal dimensions of the disability experience. By

explicitly locating the discussion of various applied ethical questions within the broader theoretical context of how disability is best conceptualized, the volume seeks to bridge the gap between abstract philosophical musings about the nature of disease, illness and disability found in much of the philosophy of medicine literature, on the one hand, and the comparatively concrete but less philosophical discourse frequently encountered in much of the disability studies literature. It also critically examines various claims advanced by disability advocates, as well as those of their critics. In bringing together leading scholars in the fields of moral theory, bioethics, and disability studies, this volume makes a unique contribution to the scholarly literature, while also offering a valuable resource to instructors and students interested in a text that critically examines and assesses various approaches to some of the most vexing problems in contemporary social and political philosophy.

Nostalgia and Hope Ov Cristian Norocel 2020-10-09 This open access book shows how the politics of migration affect community building in the 21st century, drawing on both retrogressive and progressive forms of mobilization. It elaborates theoretically and shows empirically how the two master frames of nostalgia and hope are used in local, national and transnational settings, in and outside conventional forms of doing politics. It expands on polarized societal processes and external events relevant for the transformation of European welfare systems and the reproduction of national identities today. It evidences the importance of gender in the narrative use of the master frames of nostalgia and hope, either as an ideological tool for right-wing populist and extreme right retrogressive mobilization or as an essential element of progressive intersectional politics of hope. It uses both comparative and single case studies to address different perspectives, and by means of various methodological approaches, the manner in which the master frames of nostalgia and hope are articulated in the politics of culture, welfare, and migration. The book is organized around three thematic sections whereby the first section deals with right-wing populist party politics across Europe, the second section deals with an articulation of politics beyond party politics by means of retrogressive mobilization, and the third and last section deals with emancipatory initiatives beyond party politics as well. Disciple IV Abingdon Press 2005-05 DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

The Hardmen The Velominati 2017-06-01 It's time we all stopped whining and learned a thing or two from The Toughest Cyclists Ever. Including: Stephen Roche, whose cure for exhaustion was to go up a gear and fight harder, all the way to the ambulance. Eddy Merckx, who hurt himself so badly in breaking the Hour record that, he estimated, he shortened his career by a year. Beryl Burton, who crushed her (male) rival's morale with the offer of a piece of liquorice, before speeding past to victory. Nicole Cooke and Edwig Van Hooydonck, who rejected dope and became legends. The Hardmen tells the stories - the good bits, anyway - of the 40 most heroic Cyclists ever. Their bravery, their panache and their Perfect Amount of Dumb. It reminds us that suffering on a bike liberates us from our daily lives, and that, in the words of Lance Armstrong "pain is temporary, quitting lasts forever"; proof that even assholes can be insightful.

Social Practices, Intervention and Sustainability Yolande Strengers 2014-11-13 In an era of dramatic environmental change, social change is desperately needed to curb burgeoning consumption. Many calls to action have focused on individual behaviour or technological innovation, with relative silence from the social sciences on other modes and methods of intervening in social life. This book shows how we can go beyond behaviour change in the pursuit of sustainability. Inspired by the 'practice turn' in consumption studies, this interdisciplinary book looks through the lens of social practice theory to explore important and timely questions about how to intervene in social life. It discusses a range of applied sustainability topics including energy consumption, housing provision, water demand, transport, climate change, curbside recycling and smart grids, seeking to redefine what intervention is, how it happens, and who or what can intervene to address the growing list of environmental calamities facing contemporary societies. These issues are explored through a range of specific case studies from Australia, the UK and the US, providing theoretical insights that are of international relevance. The book will be of interest to researchers and students in the fields of sociology, consumption studies, environmental studies, geography, and science and technology studies, as well as policy makers and practitioners seeking to intervene in social life for sustainability.

Ethnic Marketing Guilherme D. Pires 2018-12-17 Together with the development of transformative technologies that epitomize globalization, the ongoing movements of people across borders and other socio-economic pressures are creating a fast-changing business environment that is difficult for business to understand, let alone control. Dominant social expectations that immigrants should seek to adopt an assimilationist

socialization path towards the host country's mainstream are contradicted by minority ethnic group resilience. There is no evidence that these groups naturally disappear within the cultural and behavioural contexts of their adopted countries. Since ethnic minority consumers cannot be expected to assimilate, then they maintain some significant degree of unique ethnicity related consumer characteristics that convert into threats and opportunities for business. The inherent socialisation process also provides opportunities for ethnic entrepreneurship and for proliferation of ethnic minority business. Following from the extensive examination of scholarly perspectives of ethnic marketing theory, there is an acknowledged and marked divide between theoretical exhortations and what is done in practice, a relative oversight of the implications of mixed embedded markets, and a propinquity to overlook the crucial role played by ethnic entrepreneurship and ethnic networks. Opportunity valuations are difficult to enact due to a lack of intelligence about ethnic markets. Variable sentiment about the future of ethnic marketing links to different predictions on how the drivers of globalization will impact on the acculturation paths of ethnic minorities. Keeping a focus on the ethnic group as the unit of analysis, combining ethnic marketing and ethnic entrepreneurship theories provides intelligence about contemporary ethnic marketing and practice perspectives. The ultimate objective is to reduce the theory-practice divide through the development of a collaborative framework between business and scholars that converts into theory-in-use.

Disobedience in the Military Jean-Fran ç ois Caron 2018-07-23 We often think of the army as an institution whose members are required to blindly obey all orders they receive. However, this perception is inaccurate. Disobedience is a fundamental professional obligation of members of the military and overrides the obligation to follow commands. But what is the extent of this obligation? Are soldiers obligated to participate in what they consider to be an illegal war, or should they be allowed to enjoy a right to selective conscientious objection? Should soldiers obey a legal order that, if followed, would facilitate the perpetration of war crimes by a third party? How should soldiers act if they are ordered to follow a lawful order that could result in immoral consequences? Should soldiers be allowed to refuse to obey what can be labeled as suicidal orders? Based upon the nature of soldiers' professional obligations, this book tries to offer answers to these important questions. The author turns to a number of different case-studies, including conscientious objections, duty to protect in genocidal situations such as Rwanda and Srebrenica, suicidal orders in wars, as well as retribution and leniency towards war criminals, as a way of assessing the different legal and ethical implications of disobedience in the military.

Nancy Fraser and Participatory Parity Vivienne Bozalek 2020-05-17 Nancy Fraser and Participatory Parity provides a philosophical framework based on the work of Nancy Fraser, examining how her ideas can be used to analyse contemporary issues in higher education and reimagine

higher education practices. Providing a forum for considering Fraser's work in relation to participatory parity in higher education, the book shows how her political philosophy is relevant to higher education pedagogies, scholarship and practice. The recent student protests in South Africa in 2015 and 2016 has created an impetus to think about how to do things differently in higher education in response to economic, cultural and political inequities. This South African experience is aptly used as a prime example of rethinking issues of coloniality and social injustice in higher education. The contributors' use of Nancy Fraser's theories provides their analyses and reflections with a particularly sharp lens and clear focus. The book also puts her work into conversation with other contemporary writers on social justice and explores the resonances and differentiations of the various approaches. This book will be of great interest for academics, researchers and post-graduate students in the fields of social justice in education and educational policy.

Challenging Academia Heather Piper 2021-09-01 Some social issues and practices have become dangerous areas for academics to research and write about. 'Academic freedom' is increasingly constrained, not just by long established 'normal' factors (territoriality, power differentials, competition, protectionism), but also by the increased significance of social media and the rise of identity politics (and activists who treat work which challenges their world view as abusive hate-speech). So extreme are these pressures that some institutions and even statutory bodies now adopt policies and practices which contravene relevant regulations and laws. This book seeks to draw attention to the limiting and damaging effects of academic 'gagging'. The book, drawn from a special edition of *Societies*, offers an eclectic series of international articles which may annoy some people. The book challenges taken for granted mainstream assumptions and practices in a number of areas, including gender mainstreaming, social work education, child sexual abuse, the ethnic disaggregation of population groups, fatherhood and masculinity, the erosion of democratic legitimacy, the trap of victimhood and vulnerability, employment practices in universities, and the challenges presented by the widespread and deliberate suppression of scholarship and research. In an analytic postscript Laurent Dubreuil discusses the nature of identity politics and the manner in which its effects can be identified across the many topics covered in these challenging articles.

Less but Better Dieter Rams 2014 The new edition of the benchmark work originally published by the Dieter and Ingeborg Rams Foundation and Jo Klatt. *Less but Better* does not set out to be a complete documentation of Dieter Rams's body of work, nor does it claim to tell the full story of the company Braun. Rather, the book explores the ideas, criteria, and methods behind Rams's creations and reveals how a shifting culture of product manufacturing gave rise to universal design benchmarks.
