A Vindication of the Rights of Men Mary Wollstonecraft 2017 In 1790 came that "extraordinary outburst of passionate intelligence," Mary Wollstonecraft's reply to Edmund Burke's attack on the principles of the French Revolution entitled a "Vindication of the Rights of Men." In this pamphlet she held up to scorn Burke's defence of monarch and nobility, his merciless sentimentality. "It is one of the most dashing political polemics in the language," Mr. Taylor writes enthusiastically, "and has not had the attention it deserves. . . . For sheer virility and grip of her verbal instruments it is probably the finest of her works. Some of her sentences have the quality of a sword-edge, and they flash with the rapidity of a practised duellist. It was written at a white heat of indignation; yet it is altogether typical of the writer that, in the midst of the work, quite suddenly, she had one of her fits of callousness and morbid temper, and declared she would not go on. With great skill Johnson persuaded her to take it up again; and with equal suddenness her eagerness returned, and the book was finished and published before any one else could answer Burke."

Princeton Review AP European History Prep, 2023 The Princeton Review 2022-10-11 EVERYTHING YOU FOR A PERFECT 5. Democracy and Education John Dewey 2013-05-31 This antiquarian volume contains a comprehensive treatise on democracy and education, being an introduction to the 'philosophy of education'. Written in clear, concise language and full of interesting expositions and thought-provoking assertions, this volume will appeal to those with an interest in the role of education in society, and it would make for a great addition to collections of allied literature. The chapters of this book include: 'Education as a Necessity of Life'; 'Education as a Social Function'; 'Education as Direction'; 'Education as Growth'; 'Preparation, Unfolding, and Formal Discipline'; 'Education as Conservative and Progressive'; 'The Democratic Conception in Education'; 'Aims in Education', etcetera. We are republishing this vintage book now complete with a new prefatory biography of the author.

Karl Popper, Science and Enlightenment Nicholas Maxwell 2017-09-26 Here is an idea that just might save the world. It is that science, properly understood, provides us with the methodological key to the salvation of humanity. A version of this idea can be found in the works of Karl Popper. Famously, Popper argued that science cannot verify theories but can only refute them, and this is how science makes progress. Scientists are forced to think up something better, and it is this, according to Popper, that drives science forward. But Nicholas Maxwell finds a flaw in this line of argument. Physicists only ever accept theories that are unified - theories that depict the same laws applying to the range of phenomena to which the theory applies - even though many other empirically more successful disunified theories are always available. This means that science makes a questionable assumption about the universe, namely that all disunified theories are false. Without some such presupposition as this, the whole empirical method of science breaks down. By proposing a new conception of scientific methodology, which can be applied to all worthwhile human endeavours with problematic aims, Maxwell argues for a revolution in academic inquiry to help humanity make progress towards a better, more civilized and enlightened world.

World Studies: Medieval Times to Today Heidi Hayes Jacobs 2005

Industrial Enlightenment Peter M. Jones 2013-01-22 Identifies, for the first time, a 'provincial' variant Enlightenment in the West Midlands with Birmingham and the science activities of the Lunar Society as its focal point. Contains a great deal of new research into the history of Birmingham and its district in the eighteenth century. Adds significantly to our knowledge of the functioning of the 'Republic of Letters' in the second half of the eighteenth century. The first case-study demonstration of the dynamics of late eighteenth-century Industrial Enlightenment. Offers a re-evaluation of the role of the Lunar Society, its membership and activities, based on archival evidence never before published.

Common Sense Thomas Paine 1819

A Concise History of Modern Europe David S. Mason 2011-01-16 Highlighting the most important events, ideas, and individuals that shaped modern Europe, A Concise History of Modern Europe provides a readable, succinct history of the continent from the Enlightenment and the French Revolution to the present day. Avoiding a detailed, lengthy chronology, the book focuses on key events and ideas to explore the causes and consequences of revolutions—be they political, economic, or scientific; the origins and development of human rights and democracy; and issues of European identity. Any reader needing a broad overview of the sweep of European history since 1789 will find this book, published in a first edition under the title Revolutionary Europe, an engaging and cohesive narrative.

Making Europe: The Story of the West, Volume I to 1790 Frank L. Kidner 2013-07-16 Developed by a team of authors who have spent many years making history accessible to a diverse range of readers, each chapter of MAKING EUROPE begins with clear learning objectives and timelines, and continues with an accessible narrative that uses focus questions throughout the text to help all readers understand historical concepts. The Check-In feature and the Test Yourself questions at the end of each chapter help you assess your understanding of the material. The text uses stories of ordinary people and their impact on history, and visually stunning images and maps that make learning history interesting. Available in the following split options: MAKING EUROPE, Second Edition Complete; Since 1300; Volume 1: To 1790; and Volume 2: Since 1550. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Jewel House Deborah E. Harkness 2007-10-24 The #1 New York Times–bestselling author of *A Discovery of Witchess* examines the real-life history of the scientific community of Elizabethan London. Travel to the streets, shops, back alleys, and gardens of Elizabethan London, where a boisterous and diverse group of men and women shared a keen interest in the study of nature. These assorted merchants, gardeners, barber-surgeons, midwives, instrument makers, mathematics teachers, engineers, alchemists, and other experimenters formed a patchwork scientific community whose practices set the stage for the Scientific Revolution. While Francis Bacon has been widely regarded as the father of modern science, scores of his London contemporaries also deserve a share in this distinction. It was their collaborative, yet often contentious, ethos that helped to develop the ideals of modern scientific research. The book examines six particularly fascinating episodes of scientific inquiry and dispute in sixteenth-century London, bringing to life the individuals involved and the challenges they faced. These men and women experimented and invented, argued and competed, waged wars in the press, and struggled to understand the complexities of the natural world. Together their stories illuminate the blind alleys and surprising twists and turns taken as medieval philosophy gave way to the empirical, experimental culture that became a hallmark of the Scientific Revolution. "Elegant and erudite." —Anthony Grafton, *American Scientist* "A truly wonderful book, deeply researched, full of original material, and exhilarating to read." —John Carey, *Sunday Times* "Widely accessible." —Ian Archer, *Oxford University* "Vivid, compelling, and panoramic, this revelatory work will force us to revise everything we thought we knew about Renaissance science." —Adrian Johns, author of *The Nature Book*

Modern European History John R. Barber 2006-06-27 Master Your Coursework with Collins College Outlines The Collins College Outline for Modern European History begins with the emergence of Modern Europe in 1450, continues through the Enlightenment, the Industrial Revolution, the Age of European Revolution, the era of the Nation State, both World Wars, the post-World War II Superpower Spheres, and concludes with Europe's current trend toward an ultramodern existence. U.S. History P. Scott Corbett 2017-12-19 Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

A Serious Proposal to the Ladies, for the Advancement of Their True and Greatest Interest Mary Astell 2020-06-16 This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

The Fourth Industrial Revolution Klaus Schwab 2017-01-03 The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.
