

under constraints is multiobjective optimization as a generalization of traditional single-objective optimization. Although multiobjective optimization problems differ from single objective optimization problems only in the plurality of objective functions, it is significant to realize that multiple objectives are often noncommensurable and conflict with each other in multiobjective optimization problems. With this observation, in multiobjective optimization, the notion of Pareto optimality or efficiency has been introduced instead of the optimality concept for single-objective optimization. However, decisions with Pareto optimality or efficiency are not uniquely determined; the final decision must be selected from among the set of Pareto optimal or efficient solutions. Therefore, the question is, how does one find the preferred point as a compromise or satisficing solution with rational procedure? This is the starting point of multiobjective optimization. To be more specific, the aim is to determine how one derives a compromise or satisficing solution of a decision maker (DM), which well represents the subjective judgments, from a Pareto optimal or an efficient solution set.

High Technology, Space, and Society Manuel Castells 1985-05 The relationship between the technological revolution and the simultaneous process of worldwide urban-regional restructuring is examined in this book. Two overview chapters by Manuel Castells and Peter Hall summarize current research in the United States and Great Britain. Voices of Hope Carole B. Shmurak 1998 Fueled by media reports of gender bias in the schools, the debate over single sex education has been recently renewed. "Voices of Hope" asks for a reconsideration of the framing of that debate. For whom is single sex education better? For the attainment of which goals? What do girls gain by being schooled with male peers? What is lost? In this longitudinal study of more than fifty high school girls at four New England independent schools, Carole B. Shmurak follows their development from ninth grade through the first year of college. Case studies capture the girls' own voices as they describe their hopes for their futures and the events that subsequently affect those futures.

My Persian Girl Jonathan Rush 2012-05-01 Under its placid surface in 1978, Iran was a simmering sea of religious animosity and social resentment, which was shortly to boil over into the world's first Islamic revolution: the overthrow of the country's autocratic ruler, the Shah; and his replacement with a charismatic religious leader, Ayatollah Khomeini. My Persian Girl is an account of the impact the violent turmoil of the 1979 Iranian revolution has on three people: Shahnaz, a young Iranian woman; her husband Raman, who is an ambitious officer in Iran's secret police; and a naive young Englishman, James Harding. All these characters must make difficult decisions as Iran gradually slides towards the revolution, which threatens their personal safety. My Persian Girl is more than a love story set within a political thriller - it is a story of courage and hope in the face of momentous events, which have global resonance today.

Micro- and Nanobubbles Hideki Tsuge 2014-08-04 Microbubbles and nanobubbles have several characteristics that are comparable with millimeter- and centimeter-sized bubbles. These characteristics are their small size, which results in large surface area and high bioactivity, low rising velocity, decreased friction drag, high internal pressure, large gas dissolution capacity, negatively charged surface, and ability to be crushed and form free radicals. Microbubbles and nanobubbles have found applications in a variety of fields such as engineering, agriculture, environment, food, and medicine. Microbubbles have been successfully used in aquacultures of oysters in Hiroshima, scallops in Hokkaido, and pearls in Mie Prefecture, Japan. This field has shown a strong potential for growth. This book comprehensively discusses microbubbles and nanobubbles and their application in aquaculture, environment, engineering, medicine, stock raising, agriculture, and marine industry. It presents their potential as a new technology that can be utilized globally.

Avigdor Arikha Duncan Thomson 1996-02-28 In 1965, at the height of a successful career as an abstract painter in Paris and New York, Romanian-born Israeli artist Avigdor Arikha (b.1929) suddenly stopped painting to return to drawing from life. When he returned to painting in 1973 it was to begin on the series of intensely observed portraits, nudes and still lifes for which he is now known worldwide. Arikha's intimate still lifes include such domestic subjects as a bundle of asparagus, a corner of his Paris studio and the books on his library shelves. His portraits range from informal studies of his close friends the playwright Samuel Beckett and the photographer Henri Cartier-Bresson, to striking portrayals of public figures. Across the diversity of his subjects, Arikha succeeds with apparent effortlessness to express at the same time raw energy and quiet sensitivity, in a subtle approach that is at once intensely personal and with which one can identify. This book surveys Arikha's entire oeuvre, and includes much of his recent work. Altogether it comprises a riveting journey across the life and career of one of the most pioneering and self-reflective of recent Western painters, who stands out radiantly from an ocean of contemporary figurative painters. Arikha's an exhaustive monograph of an incredible life and demonstrates how it fuelled the formation of this subtly mesmerising and historically monumental artist.
