Decolonizing Science in Latin American Art Joanna Page 2021-04-15 Projects that bring the "hard" sciences into art are increasingly being exhibited in galleries and museums across the world. In a surge of publications on the subject, few focus on regions beyond Europe and the Anglophone world. Decolonizing Science in Latin American Art assembles a new corpus of art-science projects by Latin American artists, ranging from big-budget collaborations with NASA and MIT to homegrown experiments in artists' kitchens. While they draw on recent scientific research, these art projects also "decolonize" science. If increasing knowledge of the natural world has often gone hand-in-hand with our objectification and exploitation of it, the artists studied here emphasize the subjectivity and intelligence of other species, staging new forms of collaboration and co-creativity beyond the human. They design technologies that work with organic processes to promote the health of ecosystems, and seek alternatives to the logics of extractivism and monoculture farming that have caused extensive ecological damage in Latin America. They develop do-it-yourself, open-source, commons-based practices for sharing creative and intellectual property. They establish critical dialogues between Western science and indigenous thought, reconnecting a disembedded, abstracted form of knowledge with the cultural, social, spiritual, and ethical spheres of experience from which it has often been excluded. Decolonizing Science in Latin American Art interrogates how artistic practices may communicate, extend, supplement, and challenge scientific ideas. At the same time, it explores broader questions in the field of art, including the relationship between knowledge, care, and curation; nonhuman agency; art and utility; and changing approaches to participation. It also highlights important contributions by Latin American thinkers to themes of global significance, including the Anthropocene, climate change and environmental justice.

You Are the Universe Deepak Chopra, M.D. 2017-02-07 NEW YORK TIMES BESTSELLER "Deepak Chopra joins forces with leading physicist Menas Kafatos to explore some of the most important and baffling questions about our place in the world. "A riveting and absolutely fascinating adventure that will blow your mind wide open!" "Dr. Rudolph E. Tanzi What happens when modern science reaches a crucial turning point that challenges everything we know about reality? In this brilliant, timely, and practical work, Chopra and Kafatos tell us that we've reached just such a point. In the coming era, the universe will be completely redefined as a "human universe" radically unlike the cold, empty void where human life is barely a speck in the cosmos. You Are the Universe literally means what it says--each of us is a co-creator of reality extending to the vastest reaches of time and space. This seemingly impossible proposition follows from the current state of science, where outside the public eye, some key mysteries cannot be solved, even though they are the very issues that define reality itself: "What Came Before the Big Bang? "Why Does the Universe Fit Together So Perfectly? "Where Did Time Come From? "What Is the Universe Made Of? "Is the Quantum World Linked to Everyday Life? "Do We Live in a Conscious Universe? "How Did Life First Begin? "The shift into a new paradigm is happening," the authors write. "The answers offered in this book are not our invention or eccentric flights of fancy. All of us live in a participatory universe. Once you decide that you want to participate fully with mind, body, and soul, the paradigm shift becomes personal. The reality you inhabit will be yours either to embrace or to change." What these two great minds offer is a bold, new understanding of who we are and how we can transform the world for the better while reaching our greatest potential.

Dust To Dust (The Prophecy, Book 1) Heather Graham 2011-11-01 Not long ago, Scott Bryant would have described himself as an ordinary guy.

The Home Book of Verse (Complete) Burton Egbert Stevenson 1915

Forensis Lawrence Abu Hamdan 2014 The role of material forensics in articulating new notions of the public truth of political struggle, violent conflict, and climate change are the focus of Forensis, the HKW exhibition catalog based on the theories of Eyal Weizman. - The concept of forensis was developed as a research project by Goldsmiths College, Centre for Research Architecture by theorist Eyal Weizman. The project is the subject of a major exhibition at the Haus der Kulturen der Welt (HKW) and catalog cum theoretical reader presenting the findings and contributions of over 20 influential architects, artists, filmmakers, and academics. Forensis, (Latin for pertaining to the forum) argues for the role of material forensics as central to the interpretation of the ways in which states police and govern their subjects. Forensics engages struggles for justice across frontiers of contemporary conflict through the study of how technology mediates the testimony of material objects such as bones, ruins, toxic substances, etc. In the hopes of unlocking forensics potential as a political practice, the project participants present innovative investigations aimed at producing new kinds of evidence for use by international prosecutorial teams, political organizations, NGOs, and the UN.

Convergence Culture Henry Jenkins 2008-09 "What the future fortunes of [Gramsci's] writings will be, we cannot know. However, his permanence is already sufficiently sure, and justifies the historical study of his international reception. The present collection of studies is an indispensable foundation for this." "Eric Hobsbawm, from the preface Antonio Gramsci is a giant of Marxian thought and one of the world's greatest cultural critics. Antonio A. Santucci is perhaps the world's preeminent Gramsci scholar. Monthly Review Press is proud to publish, for the first time in English, Santucci's masterful intellectual biography of the great Sardinian scholar and revolutionary. Gramscian terms such as "civil society" and "hegemony" are much used in everyday political discourse. Santucci warns us, however, that these words have been appropriated by both radicals and conservatives for contemporary and often self-serving ends that often have nothing to do with Gramsci's purposes in developing them. Rather what we must do, and what Santucci illustrates time and again in his dissection of Gramsci's writings, is absorb Gramsci's methods. These can be summed up as the suspicion of "grand explanatory schemes," the unity of theory and practice, and a focus on the details of everyday life. With respect to the last of these, Joseph Buttigieg says in his *Nota*: "Gramsci did not set out to explain historical reality armed with some full-fledged concept, such as hegemony; rather, he examined the minutiae of concrete social, economic, cultural, and political relations as they are lived in by individuals in their specific historical circumstances and, gradually, he acquired an increasingly complex understanding of how hegemony operates in many diverse ways and under many aspects within the capillaries of society." The rigor of Santucci's examination of Gramsci's life and work matches that of the seminal thought of the master himself. Readers will be enlightened and inspired by every page.

The Ten Greatest Revivals Ever Elmer L. Towns 2004-01-31 Over the centuries God has touched the earth with revival, lifting men and women into his presence in extraordinary ways. And in some epochs the divine hand seems to have rested on us longer and to have caused more profound changes in the church and the culture. Authors Towns and Porter have studied revival eras throughout history in order to identify the ten which seem to have been the greatest of all time. If you want to understand revival and if you long to see revival in our day, this book will speak to both your mind and your heart.

Liquid Life: On Non-Linear Materiality Rachel Armstrong 2019-12-11 If we lived in a liquid world, the concept of a "machine" would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of "being alive." Liquid life references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, "brute" materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a "new materialist" and "liquid" study of matter, it conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. *Liquid Life* seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration: Rolf Hughes' "angelology" of language explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing, *Liquid Life* reunites us with the irreducible "soul substance" of living things, which will neither be simply "solved," nor go away. Rachel Armstrong is Professor of Experimental Architecture at Newcastle University (UK), and has also been a Rising Waters II Fellow for the Robert Rauschenberg Foundation (April-May 2016), TWOTY futurist in 2015, Fellow of the British Interplanetary Society, and a Senior TED Fellow in 2010. She is also the coordinator of the Living Architecture project, an EU-funded project that establishes the principles for our buildings to share some of the properties of living things, e.g. metabolism, operating at the intersection of architecture, building construction, bio-energy and synthetic biology. She is also the author of *Vibrant Architecture* (De Gruyter, 2015), *Star Ark: A Living, Self-Sustaining Spaceship* (Springer, 2017), and *Soft Living Architecture: An Alternative View of Bio-informed Design Practice* (Bloomsbury, 2018).

The Frankfurt Book Fair and Bestseller Business Beth Driscoll 2020-10-22 The Frankfurt Book Fair is the leading global industry venue for rights sales, facilitating business-to-business deals and international networks. In this *Element*, we pursue an Ullapoolist approach to excavate beneath the production of bestsellers at the Fair. Our investigation involved three consecutive years of fieldwork (2017-2019) including interviews and autoethnographic, arts-informed interventions. The *Element* argues that buzz at the Fair exists in two states: as market-ready media reports and partial, lived experiences linked to mood. The physical structures and absences of the Fair enact its power relations and direct the flow of books and buzz. Further, the Fair is not only a site for commercial exchange but a carnival of sorts, marked by disruptive historical events and problematic socio-political dynamics. Key themes emerging from the *Element* are the presence of excess, the pseudo(neo)liberal self-satisfaction of book culture, and the interplay of optimism and pessimism in contemporary publishing.

[Dust Girl](#) Sarah Zettel 2012-06-26 Fans of Libba Bray's The Diviners will love the blend of fantasy and twentieth-century history in this stylish series. Callie LeRoux is choking on dust. Just as the biggest dust storm in history sweeps through the Midwest, Callie discovers her mother's long-kept secret. Callie's not just mixed race—she's half fairy, too. Now, Callie's fairy kin have found where she's been hidden, and they're coming for her. While dust engulfs the prairie, magic unfolds around Callie. Buildings flicker from lush to shabby, and people aren't what they seem. The only person Callie can trust may be Jack, the charming ex-bootlegger she helped break out of jail. From the despair of the Dust Bowl to the hot jazz of Kansas City and the dangerous beauties of the fairy realm, Sarah Zettel creates a world rooted equally in American history and in magic, where two fairy clans war over a girl marked by prophecy. A strong example of diversity in YA, the American Fairy Trilogy introduces Callie LeRoux, a half-black teen who stars in this evocative story full of American history and fairy tales. Supports the Common Core State Standards.

[The Shallows](#) Nicholas Carr 2010-09-01 'Boldly reactionary... What looks like feast, Carr argues, may be closer to famine' Sunday Times 'Chilling' The Economist In this ground-breaking and compelling book, Nicholas Carr argues that not since Gutenberg invented printing has humanity been exposed to such a mind-altering technology. The Shallows draws on the latest research to show that the Net is literally re-wiring our brains inducing only superficial understanding. As a consequence there are profound changes in the way we live and communicate, remember and socialise - even in our very conception of ourselves. By moving from the depths of thought to the shallows of distraction, the web, it seems, is actually fostering ignorance. The Shallows is not a manifesto for luddites, nor does it seek to turn back the clock. Rather it is a revelatory reminder of how far the Internet has become enmeshed in our daily existence and is affecting the way we think. This landmark book compels us all to look anew at our dependence on this all-pervasive technology. This 10th-anniversary edition includes a new afterword that brings the story up to date, with a deep examination of the cognitive and behavioural effects of smartphones and social media.

The Global Smartphone Daniel Miller 2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland - all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

[Cities Under Siege](#) Stephen Graham 2011-11-01 Cities are the new battleground of our increasingly urban world. From the slums of the global South to the wealthy financial centers of the West, Cities Under Siege traces the spread of political violence through the sites, spaces, infrastructure and symbols of the world's rapidly expanding metropolitan areas. Drawing on a wealth of original research, Stephen Graham shows how Western militaries and security forces now perceive all urban terrain as a conflict zone inhabited by lurking shadow enemies. Urban inhabitants have become targets that need to be continually tracked, scanned and controlled. Graham examines the transformation of Western armies into high-tech urban counter-insurgency forces. He looks at the militarization and surveillance of international borders, the use of 'security' concerns to suppress democratic dissent, and the enacting of legislation to suspend civilian law. In doing so, he reveals how the New Military Urbanism permeates the entire fabric of urban life, from subway and transport networks hardwired with high-tech 'command and control' systems to the insidious militarization of a popular culture corrupted by the all-pervasive discourse of 'terrorism'.

[Runaway](#) Heather Graham 2015-12-15 New York Times bestselling author Heather Graham recreates the tumultuous history of America's

least-known frontier, Florida, in a love story that burns with passion and truth. "I accepted you as payment on a gambling table because you're incredibly beautiful. And I want you for the same reason." His smoldering gaze claimed her long before a poker hand made her his. Tara Brent knew she could never escape this dark and brooding stranger who promised her safety, with a price: marriage and life together in the lush, lethal wilderness of Florida. She didn't even know his name, only the promise of passion, and refuge in his arms. Jarret McKenzie swept his ravishing bride away from New Orleans to his remote Florida plantation, determined to uncover the desperate secret from which she ran. But he couldn't tell her of his own Seminole roots or open her guarded heart until his former commander, President Andrew Jackson, declared war on the Indians, and a powerful enemy from Tara's past found his way to their door.

The Uninhabitable Earth David Wallace-Wells 2019-02-19 ****SUNDAY TIMES AND THE NEW YORK TIMES BESTSELLER**** 'An epoch-defining book' Matt Haig 'If you read just one work of non-fiction this year, it should probably be this' David Sexton, Evening Standard Selected as a Book of the Year 2019 by the Sunday Times, Spectator and New Statesman A Waterstones Paperback of the Year and shortlisted for the Foyles Book of the Year 2019 Longlisted for the PEN / E.O. Wilson Literary Science Writing Award It is worse, much worse, than you think. The slowness of climate change is a fairy tale, perhaps as pernicious as the one that says it isn't happening at all, and if your anxiety about it is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible, even within the lifetime of a teenager today. Over the past decades, the term "Anthropocene" has climbed into the popular imagination - a name given to the geologic era we live in now, one defined by human intervention in the life of the planet. But however sanguine you might be about the proposition that we have ravaged the natural world, which we surely have, it is another thing entirely to consider the possibility that we have only provoked it, engineering first in ignorance and then in denial a climate system that will now go to war with us for many centuries, perhaps until it destroys us. In the meantime, it will remake us, transforming every aspect of the way we live—the planet no longer nurturing a dream of abundance, but a living nightmare.

The Red Book of Heroes Mrs. Andrew Lang 2015-03-04 'Life is not all beer and skittles,' said a reflective sportsman, and all books are not fairy tales. In an imperfect state of existence, 'the peety of it is that we cannot have all things as we would like them.' Undeniably we would like all books to be fairy tales or novels, and at present most of them are. But there is another side to things, and we must face it. "'Life is real, life is earnest," as Tennyson tells us,' said an orator to whom I listened lately, and though Longfellow, not Tennyson, wrote the famous line quoted by the earnest speaker, yet there is a good deal of truth in it. The word 'earnest,' like many other good words, has been overdone. It is common to sneer at 'earnest workers,' yet where would we be without them, especially in our climate? In a Polynesian island, where the skies for ever smile, and the blacks for ever dance, earnestness is superfluous. The bread-fruit tree delivers its rolls punctually every morning, strawberries or other fruits, as nice, spring beneath the feet of the dancers; the cavern in the forest provides a roof and shelter from the sun; the sea supplies a swimming-bath, and man, in time of peace, has only to enjoy himself, eat and drink, laugh and love, sing songs and tell fairy tales. His drapery is woven of fragrant flowers, nobody is poor and anxious about food, nobody is rich and afraid of losing his money, nobody needs to think of helping others; he has only to put forth his hand, or draw his bow or swing his fishing-rod, and help himself. To be sure, in time of war, man has just got to be earnest, and think out plans for catching and spearing his enemies, and drill his troops and improve his weapons, in fact to do some work, or have his throat cut, and be put in the oven and eaten. Thus it is really hard for the most fortunate people to avoid being earnest now and then. The people whose stories are told in this book were very different from each other in many ways. The child abbess, M^{lle} AngŽlique, ruling her convent, and at war with naughty abbesses who hated being earnest, does not at once remind us of Hannibal. The great Montrose, with his poems and his scented love-locks, his devotion to his cause, his chivalry, his death, to which he went gaily clad like a bridegroom to meet his bride, does not seem a companion for Palissy the Potter, all black and shrunk and wrinkled, and bowed over his furnaces. It is a long way from gentle Miss Nightingale, tending wounded dogs when a child, and wounded soldiers when a woman, to Charles Gordon playing wild tricks at school, leading a Chinese army, watching alone at Khartoum, in a circle of cruel foes, for the sight of the British colours, and the sounds of the bagpipes that never met his eyes and ears.

Digital Rubbish Jennifer Gabrys 2013-04-26 "This is a study of the material life of information and its devices; of electronic waste in its physical and electronic incarnations; a cultural and material mapping of the spaces where electronics in the form of both hardware and information accumulate, break down, or are stowed away. Electronic waste occurs not just in the form of discarded computers but also as a scatter of information devices, software, and systems that are rendered obsolete and fail. Where other studies have addressed "digital" technology through a focus on its immateriality or virtual qualities, Gabrys traces the material, spatial, cultural, and political infrastructures that enable the emergence and dissolution of these technologies. In the course of her book, she explores five interrelated "spaces" where electronics fall apart: from Silicon Valley to Nasdaq, from containers bound for China to museums and archives that preserve obsolete electronics as cultural artifacts, to the landfill as material repository. All together, these sites stack up into a sedimentary record that forms the "natural history" of this study. Digital Rubbish: A Natural History of Electronics describes the materiality of electronics from a unique perspective, examining the multiple forms of waste that electronics create as evidence of the resources, labor, and imaginaries that are bundled into these machines. By drawing on the material analysis developed by Walter Benjamin, this natural history method allows for an inquiry into electronics that focuses neither on technological progression nor on great inventors but rather considers the ways in which electronic technologies fail and decay. Ranging across studies of media and technology, as well as environments, geography, and design, Jennifer Gabrys pulls together the far-reaching material and cultural processes that enable the making and breaking of these technologies"--Publisher's description.

Acheron Sherrilyn Kenyon 2011-09-22 Eleven thousand years ago a god was born. Cursed into the body of a human, Acheron endured a lifetime of hatred. His human death unleashed an unspeakable horror that almost destroyed the earth. Brought back against his will, he became the sole defender of mankind. Only it was never that simple... For centuries, he has fought for our survival and hidden a past he never wants revealed. Now his survival, and ours, hinges on the very woman who threatens him. Old enemies are reawakening and uniting to kill them both.

Latter-day Screens Brenda R. Weber 2019-09-13 From *Sister Wives* and *Big Love* to *The Book of Mormon* on Broadway, Mormons and Mormonism are pervasive throughout American popular media. In *Latter-day Screens*, Brenda R. Weber argues that mediated Mormonism contests and reconfigures collective notions of gender, sexuality, race, spirituality, capitalism, justice, and individualism. Focusing on Mormonism as both a meme and an analytic, Weber analyzes a wide range of contemporary media produced by those within and those outside of the mainstream and fundamentalist Mormon churches, from reality television to feature films, from blogs to YouTube videos, and from novels to memoirs by people who struggle to find agency and personhood in the shadow of the church's teachings. The broad archive of mediated Mormonism contains socially conservative values, often expressed through neoliberal strategies tied to egalitarianism, meritocracy, and self-actualization, but it also offers a passionate voice of contrast on behalf of plurality and inclusion. In this, mediated Mormonism and the conversations on social justice that it fosters create the pathway toward an inclusive, feminist-friendly, and queer-positive future for a broader culture that uses Mormonism as a gauge to calibrate its own values.
