After Promontory Center for Railroad Photography & Art 2019-03-01 Celebrating the sesquicentennial anniversary of the completion of the first transcontinental railroad in the United States, After Promontory: One Hundred and Fifty Years of Transcontinental Railroading profiles the history and heritage of this historic event. Starting with the original Union Pacific-Central Pacific lines that met at Promontory Summit, Utah, in 1869, the book expands the narrative by considering all of the transcontinental routes in the United States and examining their impact on building this great nation. Exquisitely illustrated with full color photographs, After Promontory divides the western United States into three regions-central, southern, and northern-and offers a deep look at the transcontinental routes of each one. Renowned railroad historians Maury Klein, Keith Bryant, and Don Hofsommer offer their perspectives on these regions along with contributors H. Roger Grant and Rob Krebs.

Rowling and Lemony Snicket and to cover the very latest on publishing and educational trends, this edition features more than 475 entries on the best-loved children's authors and illustrators, numerous essays on social and historical issues, thirty personal glimpses into craft by well-known writers, illustrators, and critics, and invaluable reading lists by category. *The Essential Guide to Children's Books and Their Creators* summarizes the canon of contemporary children's literature, in a practical guide essential for anyone choosing a book for or working with children.

Look-Alikes Jr. Joan Steiner 2003-10-17 Welcome to Look-Alike Land, where the more you look, the more you see! Like its predecessor, *Look-Alikes Jr.* features 3-D picture puzzles, but this time invites even the youngest child to join in the fun by featuring simpler, easier-to-find look-alikes in childlike settings. There are 11 scenes - house, parlor, kitchen, bedroom, school bus, classroom, construction site, movie lobby, train, farm, and rocket - each with 50+ objects to identify (700+ in total). Look for a cement mixer made out of a mustard bottle, kitchen cabinets made out of cakes of soap, and a bed built with crayons and pasta! Fun for all ages. This best-selling book is back with a brand new series design and a striking new cover.

A Beginner's Guide to Constructing the Universe Michael S. Schneider 2014-04-01 Discover how mathematical sequences abound in our natural world in this definitive exploration of the geography of the cosmos. You need not be a philosopher or a botanist, and certainly not a

mathematician, to enjoy the bounty of the world around us. But is there some sort of order, a pattern, to the things that we see in the sky, on the ground, at the beach? In *A Beginner's Guide to Constructing the Universe*, Michael Schneider, an education writer and computer consultant, combines science, philosophy, art, and common sense to reaffirm what the ancients observed: that a consistent language of geometric design underpins every level of the universe, from atoms to galaxies, cucumbers to cathedrals. Schneider also discusses numerical and geometric symbolism through the ages, and concepts such as periodic renewal and resonance. This book is an education in the world and everything we can't see within it. Contains numerous b&w photos and illustrations.

London In The Nineteenth Century Jerry White 2011-06-08 Jerry White's *London in the Nineteenth Century* is the richest and most absorbing account of the city's greatest century by its leading expert. London in the nineteenth century was the greatest city mankind had ever seen. Its growth was stupendous. Its wealth was dazzling. Its horrors shocked the world. This was the London of Blake, Thackeray and Mayhew, of Nash, Faraday and Disraeli. Most of all it was the London of Dickens. As William Blake put it, London was 'a Human awful wonder of God'. In Jerry White's dazzling history we witness the city's unparalleled metamorphosis over the course of the century through the daily lives of its inhabitants. We see how Londoners worked, played, and adapted to the demands of the metropolis during this century of dizzying change. The result is a panorama teeming with life.

Symmetry Kristopher Tapp 2021-08-28 This textbook is perfect for a math course for non-math majors, with the goal of encouraging effective analytical thinking and exposing students to elegant mathematical ideas. It includes many topics commonly found in sampler courses, like Platonic solids, Euler's formula, irrational numbers, countable sets, permutations, and a proof of the Pythagorean Theorem. All of these topics serve a single compelling goal: understanding the mathematical patterns underlying the symmetry that we observe in the physical world around us. The exposition is engaging, precise and rigorous. The theorems are visually motivated with intuitive proofs appropriate for the intended audience. Students from all majors will enjoy the many beautiful topics herein, and will come to better appreciate the powerful cumulative nature of mathematics as these topics are woven together into a single fascinating story about the ways in which objects can be symmetric.

Tiny Crimes Lincoln Michel 2018-06-05 Forty very short stories that reimagine the genre of crime writing from some of today's most imaginative and thrilling writers "An intriguing take on crime/noir writing, this collection of 40 very short stories by leading and emerging literary voices—Amelia Gray, Brian Evenson, Elizabeth Hand, Carmen Maria Machado, Benjamin Percy, Laura van den Berg and more—investigates crimes both real and imagined. Despite their diminutive size, these tales promise to pack a punch." —Chicago Tribune, 1 of 25 Hot Books for Summer Tiny Crimes gathers leading and emerging literary voices to tell tales of villainy and intrigue in only a few hundred words. From the most hard-boiled of noirs to the coziest of mysteries, with diminutive double crosses, miniature murders, and crimes both real and imagined, Tiny Crimes rounds up all the usual suspects, and some unusual suspects, too. With illustrations by Wesley Allsbrook and flash fiction by Carmen Maria Machado, Benjamin Percy, Amelia Gray, Adam Sternbergh, Yuri Herrera, Julia Elliott, Elizabeth Hand, Brian Evenson, Charles Yu, Laura van

den Berg, and more, Tiny Crimes scours the underbelly of modern life to expose the criminal, the illegal, and the depraved.

Unlocking the Power of Classroom Talk Shana Frazin 2019-09-19 Shana Frazin and Katy Wischow passionately believe in the need to help students develop strong talk skills across the school day, in every subject, to prepare them for their academic lives and lives as active citizens outside of school. Using a unique "cycle" for talk that's similar to the writing process (generating, choosing, developing, acting, and reflecting), they name the predictable things we do most times we engage in a conversation, and show us how we can teach into those parts. Shana and Katy provide practical strategies for teaching four important purposes for talk that exist both in the classroom and in the real world: - talking to build relationships - talking to play with ideas - talking to clarify, analyze, and argue - talking to report. They offer a clear description of each purpose, the "when and how" to teach into those purposes, and what to do when things go awry. Classroom video brings the content to life showing what the talk looks and sounds like in action.

Surrender the Heart M. L. Tyndall 2010 On the brink of the war of 1812, Marianne Denton must marry to unlock her inheritance. Without the money, her mother can't receive medical care and her sister will be destitute. But Noah Brenin needs to sail his cargo to England before the war commences in order to prove his worth to his father and make enough money so he won't have to marry at all. When Noah walks out on their engagement party, Marianne chases him down and ends up on his merchantman out at sea. The situation is impressed into the British navy. While a young lad's prophecy of destiny looms over them both, Marianne and Noah are forced to face their darkest fears as they desperately try to escape and fulfill their destinies - destinies that could change the course of the war and history forever--

Calm-Down Time Elizabeth Verdick 2010-05-01 Every parent, caregiver--and toddler--knows the misery that comes with meltdowns and temper tantrums. Through rhythmic text and warm illustrations, this gentle, reassuring book offers toddlers simple tools to release strong feelings, express them, and calm themselves down. Children learn to use their calm-down place--a quiet space where they can cry, ask for a hug, sing to themselves, be rocked in a grown-up's arms, talk about feelings, and breathe: "One, two, three . . . I'm calm as

can be. I'm taking care of me." After a break, toddlers will feel like new—and adults will, too. Books include tips for parents and caregivers.

Enumeration of Finite Groups Simon R. Blackburn 2007-10-18 How many groups of order n are there? This is a natural question for anyone studying group theory, and this Tract provides an exhaustive and up-to-date account of research into this question spanning almost fifty years. The authors presuppose an undergraduate knowledge of group theory, up to and including Sylow's Theorems, a little knowledge of how a group may be presented by generators and relations, a very little representation theory from the perspective of module theory, and a very little cohomology theory - but most of the basics are expounded here and the book is more or less self-contained. Although

it is principally devoted to a connected exposition of an agreeable theory, the book does also contain some material that has not hitherto been published. It is designed to be used as a graduate text but also as a handbook for established research workers in group theory.

Animal Snackers Betsy Lewin 2004-09 Short poems describe the eating habits of many different kinds of animals.
