The Hasheesh Eater Fitz Hugh Ludlow 2006-07-06 Fitz-Hugh Ludlow was a recent graduate of Union College in Schenectady, New York, when he vividly recorded his hasheesh-induced visions, experiences, adventures, and insights. During the mid-nineteenth century, the drug was a legal remedy for lockjaw and Ludlow had a friend at school from whom he received a ready supply. He consumed such large quantities at each sitting that his hallucinations have been likened to those experienced by opium addicts. Throughout the book, Ludlow colorfully describes his psychedelic journey that led to extended reflections on religion, philosophy, medicine, and culture. First published in 1857, The Hasheesh Eater was the first full-length American example of drug literature. Yet despite the scandal that surrounded it, the book quickly became a huge success. Since then, it has become a cult classic, first among Beat writers in the 1950s and 1960s, and later with San Francisco Bay area hippies in the 1970s. In this first scholarly edition, editor Stephen Rachman positions Ludlow's enduring work as not just a chronicle of drug use but also as a window into the budding American bohemian literary scene. A lucid introduction explores the breadth of Ludlow's classical learning as well as his involvement with the nineteenth-century subculture that included fellow revelers such as Walt Whitman and the pianist Louis Gottschalk. With helpful annotations guiding readers through the text's richly allusive qualities and abundance of references, this edition is ideal for classroom use as well as for general readers.

Aesthetic Theory Theodor W. Adorno Adorno 2020-06-09 Perhaps the most important aesthetics of the twentieth century appears here newly translated, in English that is for the first time faithful to the intricately demanding language of the original German. The culmination of a lifetime of aesthetic investigation, Aesthetic Theory is Adorno's major work, a defense of modernism that is paradoxical in its defense of illusion. In it, Adorno takes up the problem of art in a day when "it goes without saying that nothing concerning art goes without saying." In the course of his discussion, Adorno revisits such concepts as the sublime, the ugly, and the beautiful, demonstrating that concepts such as these are reservoirs of human experience. These experiences ultimately underlie aesthetics, for in Adorno's formulation "art is the sedimented history of human misery." Robert Hullot-Kentor's translation painstakingly, yet fluently, reproduces the nuances and particularities of the original. Long awaited and significant, Aesthetic Theory is the clarifying lens through which the whole of Adorno's work is best viewed, providing a framework within which his other major writings cohere.

Pre-text, Text, Context Robert L. Mitchell 1980 The nineteenth century in France is a nightmare for literary historians. Their thirst for categorization is more easily quenched by prior centuries, to which, because they seem unified by cohesive preoccupations and common goals, such appellations as the Renaissance, the Classical Age or le grand siècle, and the Enlightenment or Age of Ideas are appropriately applied. For the protean nineteenth century, for which no such handy tag has been or can be devised, is beyond all else distinguished by extreme heterogeneity and eclecticism. A period of chaotic social and political instability, of scientific and industrial revolution, it is, in literature, a time, not of solidarity, but of unprecedented individualism. Collective social consciousness yields to isolated probings into the uncharted recesses of the human mind and soul, and revolt against standardized (even valorized) literary practice is seen in such developments as the slow undermining of the "accepted" literary lexicon, and of the qualities of unity, clarity, and reason, and in a radical overhauling of the system of prosody; such diversity precludes coherence in nineteenth-century French literature, it can itself be recognized as the organizing element of this literary epoch. And it is precisely this paradox that the essays in this volume intend to reflect. They are not unified, as orthodoxy might dictate, by a common approach or theme or author. Rather they are marked, as was the century that is their context, by divergence and variety, not harmony and consistency. Multiformity in theme is reflected in discussions of such varied topics as pygmalionism, allegory, mirage, self-consciousness, plagiarism, madness, feminism, the grotesque, dance, and alchemy, which are addressed, in turn, from a variety of critical approaches: thematic, intertextual, historical, stylistic, psychocritical, sociological, and semiotic. Eclecticism, indeed, has shaped the basic conception of the collection. Part 1 examines themes, presented as "pretext", that inform either authorial motivation or the orientation of a text prior to its actual inscription. Part 2 approaches the process of writing from the perspective of the text itself. And Part 3 is concerned with those spatial, temporal, and linguistic elements (context) that surround the literary text.

The Story Book of Science Henri Fabre 2013-03-01 Fabre had many scholarly achievements. He was a popular teacher, physicist, chemist, and botanist. However, he is probably best known for his findings in the field of entomology, the study of insects, and is considered by many to be the father of modern entomology. Much of his enduring popularity is due to his marvelous teaching ability and his manner of writing about the lives of insects in biographical form. **Dreamscape Adventures, Inc.** A. The Spell of the Sensuous David Abram 2012-10-17 Winner of the International Lannan Literary Award for Nonfiction Animal tracks, word magic, the speech of stones, the power of letters, and the taste of the wind all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us. This major work of ecological philosophy startles the senses out of habitual ways of perception. For a thousand generations, human beings viewed themselves as part of the wider community of nature, and they carried on active relationships not only with other people with other animals, plants, and natural objects (including mountains, rivers, winds, and weather patterns) that we have only lately come to think of as "inanimate." How, then, did humans come to sever their ancient reciprocity with the natural world? What will it take for us to recover a sustaining relation with the breathing earth? In *The Spell of the Sensuous*, David Abram draws on sources as diverse as the philosophy of Merleau-Ponty, Balinese shamanism, Apache storytelling, and his own experience as an accomplished sleight-of-hand of magician to reveal the subtle dependence of human cognition on the natural environment. He explores the character of perception and excavates the sensual foundations of language, which—even at its most abstract—echoes the calls and cries of the earth. On every page of this lyrical work, Abram weaves his arguments with a passion, a precision, and an intellectual daring that recall such writers as Loren Eiseley, Annie Dillard, and Barry Lopez.

Between State and Market W. Lieberman 1997-01-01 IFC Discussion Paper No. 32. Over the years, demand for education at all levels in Kenya has greatly outpaced supply, a gap that has been reduced by private schools catering to the needs of a wide range of socioeconomic groups. This gap will widen further unless the private sectors role is expanded, but private educational institutions face a number of serious constraints, primarily stemming from lack of adequate finance and, in many cases, limited management skills. This paper reviews the market and its constraints and focuses on conditions under which private financial institutions and the International Finance Corporation might play a useful role in the sector. Annexes include 1996 operating costs of Kenya's academic, technical and vocational schools.

To the Lighthouse Virginia Woolf 2021-06-24 Described by Virginia Woolf herself as 'easily the best of my books', and by her husband Leonard as a 'masterpiece', *To the Lighthouse*, first published in 1927, is one of the milestones of Modernism. Set on the Isle of Skye, over a decade spanning the First World War, the narrative centres on the Ramsay family, and is framed by Mrs Ramsay's promise to take a trip to the lighthouse the next day – a promise which isn't to be fulfilled for a decade. Flowing from character to character and from year to year, the novel paints a moving portrait of love, loss and perception. Bearing all the hallmarks of Woolf's prose, with her delicate handling of the complexities of human relationships, *To the Lighthouse* has earned its reputation – frequently appearing in lists of the best novels of the twentieth century, it has lost not an iota of brilliance.

Asset Recovery Handbook Jean-Pierre Brun 2021-02-08 Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be overwhelming for even the most experienced practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, and limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.

Gaining Competitive Advantage in the Gray Zone **by** J. Morris 2019-09-15 The United States is entering a period of intensifying strategic competition with several rivals, most notably Russia and China. U.S. officials expect this competition to be played out primarily below the threshold of armed conflict, in what is sometimes termed the gray zone between peace and war. In this report, the authors examine how the United States might respond to Russian and Chinese efforts to seek strategic advantage through coercive actions in the gray zone, including military, diplomatic, informational, and economic tactics. The United States is ill-prepared and poorly organized to compete in this space, yet the authors' findings suggest that the United States can begin to treat the ongoing gray zone competition as an opportunity more than a risk. Moreover, leaders in Europe and Asia view Russian and Chinese gray zone aggression as a meaningful threat and are receptive to U.S. assistance in mitigating it. In this report, the authors use insights from their extensive field research in affected countries, as well as general research into the literature on the gray zone phenomenon, to sketch out the elements of a strategic response to the gray zone challenge and develop a menu of response options for U.S. officials to consider.

Middlemarch **by** George Eliot 2015-05-02 Who that cares much to know the history of man, and how the mysterious mixture behaves under the varying experiment of Time, has not dwelt, at least briefly, on the life of Saint Theresa, has not smiled with some gentleness at the thought of the little girl walking forth one morning hand-in-hand with her still smaller brother, to go and seek martyrdom in the country of the Moors? Out they toddled from rugged Avila, wide-eyed and helpless-looking as two fawns, but with human hearts, already beating to a national idea: until domestic reality met them in the shape of uncles, and turned them back from their great resolve. That child-pilgrimage was a fit beginning. Theresa's passionate, ideal nature demanded an epic life: what were many-volumed romances of chivalry and the social conquests of a brilliant girl to her? Her flame quickly burned up that light fuel; and, fed from within, soared after some illimitable satisfaction some object which would never justify weariness, which would reconcile self-despair with the rapturous consciousness of life beyond self. She found her epos in the reform of a religious order.

Critique of Black Reason **by** Achille Mbembe 2017-02-17 In *Critique of Black Reason* eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world's center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of exclusion. With *Critique of Black Reason*, Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

In the Realm of Hungry Ghosts **by** Gabor Maté, MD 2009-04-03 In this timely and profoundly original new book, bestselling writer and physician Gabor Maté looks at the epidemic of addictions in our society, tells us why we are so prone to them and what is needed to liberate ourselves from their hold on our emotions and behaviours. For over seven years Gabor Maté has been the staff physician at the Portland Hotel, a residence and harm reduction facility in Vancouver's Downtown Eastside. His patients are challenged by life-threatening drug addictions, mental illness, Hepatitis C or HIV and, in many cases, all four. But if Dr. Maté's patients are at the far end of the spectrum, there are many others among us who are also struggling with addictions. Drugs, alcohol, tobacco, work, food, sex, gambling and excessive inappropriate spending: what is amiss with our lives that we seek such self-destructive ways to comfort ourselves? And why is it so difficult to stop these habits, even as they threaten our health, jeopardize our relationships and corrode our lives? Beginning with a dramatically close view of his drug addicted patients, Dr. Maté looks at his own history of compulsive behaviour. He weaves the stories of real people who have struggled with addiction with the latest research on addiction and the brain. Providing a bold synthesis of clinical experience, insight and cutting edge scientific findings, Dr. Maté sheds light on the most puzzling of human frailties. He proposes a compassionate approach to helping drug addicts and, for the many behaviour addicts among us, to addressing the void addiction is meant to fill. I believe there is one addiction process, whether it manifests in the lethal substance dependencies of my Downtown Eastside patients, the frantic self-soothing of overeaters or shopaholics, the obsessions of gamblers, sexaholics and compulsive internet users, or in the socially acceptable and even admired behaviours of the workaholic. Drug addicts are often dismissed and discounted as unworthy of empathy and respect. In telling their stories my intent is to help their voices to be heard and to shed light on the origins and nature of their ill-fated struggle to overcome suffering through substance use. Both their flaws and their virtues they share much in common with the society that ostracizes them. If they have chosen a path to nowhere, they still have much to offer the rest of us. In the dark mirror of their lives we can trace outlines of our own. —from *In the Realm of Hungry Ghosts*

Digital Roots **by** Gabriele Balbi 2021-09-07 As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, *Technologies and Connections*, historicizes concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to *Agency and Politics* and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, *Users and Practices*, is finally devoted to telepresence, digital loneliness, amateurism, user generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

Information—Consciousness—Reality **by** James B. Glattfelder 2019-04-10 This open access book chronicles the rise of a new scientific paradigm offering novel insights into the age-old enigmas of existence. Over 300 years ago, the human mind discovered the machine code of reality: mathematics. By utilizing abstract thought systems, humans began to decode the workings of the cosmos. From this understanding, the current scientific paradigm emerged, ultimately discovering the gift of technology. Today, however, our island of knowledge is surrounded by ever longer shores of ignorance. Science appears to have hit a dead end when confronted with the nature of reality and consciousness. In this fascinating and accessible volume, James Glattfelder explores a radical paradigm shift uncovering the ontology of reality. It is found to be information-theoretic and participatory, yielding a computational and programmable universe.
