*Engaging Employers in Apprenticeship Opportunities International Labour Organization 2017* This joint OECD-ILO publication provides guidance on how local and regional governments can foster business-education partnerships in apprenticeship programmes and other types of work-based learning, drawing on case studies across nine countries. There has been increasing interest in apprenticeships which combine on the job training with classroom-based study, providing a smooth transition from school to work. There are benefits to both individuals and employers from participating in apprenticeships, including increased productivity and job quality. Successful implementation is contingent on having a high level of employer engagement at the local level, notably in the design, development and delivery of programmes.

*The Job Closer Steve Dalton 2021-04-20* The author of *The 2-Hour Job Search* shows you how to land your dream job, from writing the perfect resume and cover letter to nailing any interview and negotiating your offer. Steve Dalton's *2-Hour Job Search* simplified the process of finding work by utilizing technology, and now *The Job Closer* helps you seal the deal by applying his time-saving techniques to the surrounding steps. As a career consultant, Dalton has found that job seekers routinely overinvest in trivial aspects of the employment hunt while underestimating the important ones. In this guide, you'll learn how to avoid wasted effort and excel in all areas by using tools such as: • The FIT Model, which helps job seekers nail the answer to "Tell me about yourself" using principles from the world of screenwriting • The RAC Model, perfect for writing efficient cover letters and answering "Why this company or job?" in an interview • The CAR Matrix, designed to help you craft compelling interview stories and deploy them in the most powerful way • The Pre-negotiation Call, which takes the awkwardness out of asking for more and turns your negotiator from an adversary into a partner • And many more . . . *The Job Closer* will leave you with more time for networking, making meaningful connections, and showcasing your unique talents, so your odds of success in landing the perfect job improve exponentially

**General Machinist Ontario. Ministry of Training, Colleges and Universities 2008-01-01** "This new curriculum standard for the Level 2 - General Machinist for the Machining and Tooling trades is based upon the on-the-job performance objectives, located in the industry approved training standard. The curriculum is organized into 8 reportable subjects. The Program Summary of Reportable Subjects chart summarizes the training hours for each reportable subject. The curriculum identifies only the learning that takes place off-the-job. The in-school program focuses primarily on the theoretical knowledge and the essential skills required to support the performance objectives of the Apprenticeship Training Standards. Employers/Sponsors are expected to extend the apprentice's knowledge and skills through practical training on the work site."--Document.

**Physics of Nonlinear Optics** Guang S He 1999-12-29 Nonlinear optics has been a rapidly growing field in recent decades. It is based on the study of effects and phenomena related to the interaction of intense coherent light radiation with matter. Physics of Nonlinear Optics describes various major nonlinear optical effects, including physical principles, experimental techniques, up-to-date research achievements, and current or potential applications. This book features clear conceptual descriptions, concise formulations, and emphasizes both theoretical and experimental aspects of nonlinear optics. The readability of this book is particularly enhanced by a series of color photographs showing the spectacular appearances of various nonlinear optical effects. Both authors of this book are outstanding research scientists renowned in their professional areas. Their major research achievements in nonlinear optics include the pioneering studies of two-wave-coupled refractive-index change, Raman-enhanced self-focusing, optical-frequency Pockels effect, stimulated Kerr scattering, optical phase-conjugation via backward stimulated emission, and two-photon-absorption based optical limiting, stabilization and reshaping.
