*Schooling and Society Gordon Tait 2017-04-27* This new book is a wide-ranging, contemporary and accessible analysis of familiar and recurring myths about mass education in the United Kingdom. Looking at a variety of important issues and problems, each chapter begins by dispelling myths and assumptions about the classroom, going beyond class, race and gender, to offer analysis of topics such as discipline, youth cultures, information technology and globalisation. Utilising an interdisciplinary lens, this book offers knowledge from disciplines as diverse as sociology, philosophy, jurisprudence and cultural studies. Gordon Tait examines the strengths and weaknesses of different theoretical approaches to education, from critical theory to postmodernism, and Foucaultian governance to post-colonialism. Analysing the many assumptions about education taken for granted in British public discourse, important conclusions are drawn about which of these assumptions are fair and reasonable, and which we should challenge. This book is an essential resource for advanced undergraduate and postgraduate courses on the sociology of education, culture and education, and the philosophy of education.

Errors and Misconceptions in Maths at Key Stage 2 Mike Spooner 2002-01-01 The activities in this book are designed both to help children to learn and to understand math concepts, and also to prepare them for taking SATS papers at KS2. There is plenty of research evidence to suggest that children are helped in their understanding of math problems if teachers focus on common misconceptions, and if children are given opportunities for discussion and explanation of their own understanding. Children can also feel stigmatized by being made to focus on their own errors. Mike Spooner has developed activities that present already completed work which children then assess, correct and discuss - in this way they can analyze mistakes without damage to their own self-esteem. The activities are presented in the same format as the SATS papers, to give children practice in coping with that format. The book also contains writing frames that children can use to structure their discussions of math problems.

My Big Brother JJ Odette Elliott 2009 J.J. must baby-sit his little sister for a week while their mother is at work. The siblings have fun together doing different things each day, and on the last day they decide to paint a mural on the garden shed. Just when they're finishing, little sister has an accident and paint spills everywhere. When Mom arrives she is horrified by the mess, that is until she notices the mural.

Grandfather's Pencil and the Room of Stories Michael Foreman 1995 As a small boy slips into the dreamy world of sleep the everyday objects in his bedroom bring to life their histories. The pencil recalls life as a tall tree, the paper remembers the trill of the river-ride as a log and the floorboards creakily sigh at the memory of being the bows of a great sailing ship. In the world of imagination, everything has a wonderful tale to tell.

Provision Mapping Anne Massey 2013 Written by an experienced practitioner who has a very current understanding of the school context, this book gives a fantastically clear, detailed and realistic strategy for primary schools with regards to raising attainment and inclusive practice. Anne Massey has provided a cogent and manageable system of provision mapping for whole-school improvement. - Pippa Whittaker, SENCO, Hans Price Academy, UK. 'This very detailed book will enable schools to develop whole school approaches which improve outcomes and ensure that they are removing barriers to participation and achievement for all children.' - Dr Peter Grimes, Principal Lecturer in Inclusive School Development, Canterbury Christ Church University, UK. This highly practical book contains all the guidance and resources a school will need in order to implement an efficient and effective system of pupil progress tracking and evaluative Provision Mapping. It is a tried and tested system that has been shown to improve outcomes for all pupils, including those with SEN, and sits at the very heart of school self-evaluation. Throughout this book, teachers will find achievable solutions to the problems schools face in trying to ensure that their practice results in all pupils making good progress. Anne Massey has adapted the original version of Provision Mapping and developed it into a more evaluative framework that links a number of school improvement actions together. All the recommendations in this book have been tried and tested in Primary schools, and have been proven to: bring about better progress and engagement for all pupils; provide an enhanced understanding of inclusion by teachers; improve communication between the school, parents and the Local Authority; reduce bureaucracy and paperwork for SENCOs; foster an improved understanding of 'value for money'. Headteachers, senior managers, leadership teams, SENCOs and other educational professionals will find the guidance and support provided by this toolkit invaluable. Provision Mapping will also be of value to those studying the more SEN-specific postgraduate diplomas or Masters level qualifications.

Towards Dialogic Teaching R. J. Alexander 2006-01-01 With dialogue and dialogic teaching as upcoming buzz-words, we face a familiar mix of danger and opportunity. The opportunity is to transform classroom talk, increase pupil engagement, and lift literacy standards from their current plateau. The danger is

that a powerful idea will be jargonised before it is even understood, let alone implemented, and that practice claiming to be dialogic will be little more than re-branded chalk and talk or ill-focused discussion. Dialogic teaching is about more than applying tips such as less hands-up bidding. It demands changes - in the handling of classroom space and time; in the balance of talk, reading and writing; in the relationship between speaker and listener; and in the content and dynamics of talk itself.

EBOOK: Becoming a Teacher: Issues in Secondary Education Meg Maguire 2018-02-16 Becoming a Teacher provides a broad context for understanding education, addressing issues such as the influence of international policy and practice, education ideology and social justice. This is balanced with practical advice for the classroom on topics such as assessment for learning, learning technologies, literacy, numeracy and English as an additional language. Becoming a Teacher draws extensively on contemporary research and empirical evidence to support critical reflection about learning and teaching. Encouraging you to reflect on your knowledge and beliefs, it explores some of the complex social and cultural influences that influence professional learning and practice. The approach chimes with the government's recognition that trainee teachers should take a research-informed approach towards classroom practice. The fifth edition is refreshed and revitalized throughout, with: • a complete revision of each chapter • new chapters on 'Reforming ITE', 'Teachers Lives and Careers', 'International Influences', 'Engagement and Motivation', 'Learning and the Emotions', 'Data Usage in Schools', 'Safeguarding' and 'Learning with Digital Technologies' • up-to-date referencing of research findings • insightful policy analysis • critical commentary on issues For those training to teach in secondary school on a Postgraduate Certificate in Education (PGCE) or a School Direct programme, or taking an undergraduate or postgraduate Education Studies course, Becoming a Teacher provides invaluable support, insight and guidance. "With every new edition this book confirms its place as one of the most commanding, authoritative and influential texts in teacher education". Meg Maguire's leadership of this new editorial team means that this book remains my umbilical cord to those pivotal principals that I cherish in education: integrity, passion, critical engagement and transformation." Gerry Czerniawski, Professor of Education, University of East London, UK "An excellent contribution to the Teacher Education and development literature". "Many of the authors are leading thinkers in their field and as such the book offers a significant breadth, depth and coherence to the teacher development discourse." Professor David Spendlove, School of Environment, Education and Development, The University of Manchester, UK

11+ Maths Multiple Choice Practice Papers Eleven Plus Exams 2012-07-01 A radically different new concept in exam preparation, providing individual on-line evaluation and vital access to peer group comparison. The First Past the Post Practice papers series is a leading-edge new product for 11+ exam preparation formulated by on-line market leader ElevenPlusExams. There is no national syllabus for the 11+ exam, no pass mark and no retake option. Unlike conventional exams it's always been examined on a first past the post principle. 2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee 2013-06-11 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

The importance of teaching Great Britain: Department for Education 2010-11-24 England's school system performs below its potential and can improve significantly. This white paper outlines action designed to: tackle the weaknesses in the system; strengthen the status of teachers and teaching; reinforce the standards set by the curriculum and qualifications; give schools back the freedom to determine their own development; make schools more accountable to parents, and help them to learn more quickly and systematically from good practice elsewhere; narrow the gap in attainment between rich and poor. The quality of teachers and teaching is the most important factor in determining how well children do. The Government will continue to raise the quality of new entrants to the profession, reform initial teacher training, develop a network of "teaching schools" to lead training and development, and reduce the bureaucratic burden on schools. Teachers will be given more powers to control bad behaviour. The National Curriculum will be reviewed, specifying a tighter model of knowledge of core subjects so that the Curriculum becomes a benchmark against which school can be judged. Schools will be given more freedom and autonomy, the Academies programme extended and parents will be able to set up "Free Schools" to meet parent demand. Accountability for pupil performance is critical, and much more information will be available to aid understanding of a school's performance. School improvement will be the responsibility

of schools, not central government. Funding of schools needs to be fairer and more transparent, and there will be a Pupil Premium to target resources on the most deprived pupils.

Debates in Primary Education Virginia Bower 2020-10-20 This powerful text encourages both pre-service and established teachers, as well as teacher educators, to engage with contemporary debates in primary education. Promoting a critical approach, the chapters explore a wide range of key themes including the importance of values in primary education and the imperative for a curriculum which embraces the whole range of available subjects. At the same time, the chapters are underpinned by a belief that children should be at the heart of all the decisions we make and that primary education should inspire a love of learning, for life. The book aims to support practitioners to make informed judgements and feel confident to argue their point of view with deeper theoretical knowledge and understanding, thus increasing teacher agency and confidence in responding to complex educational and social dilemmas such as literacy levels and rising mental health concerns. Chapters encompass both the macro aspects of primary education and more specialised debates on key topics such as reading, mathematics, languages, early years education and the use of technology. With annotated further reading and reflective questions, this key text is essential reading for all those wanting to develop a better understanding of the issues that shape their practice including student teachers at both undergraduate and postgraduate level, practising teachers engaged in continuing professional development and teacher educators.

I Had a Black Dog Matthew Johnstone 2012-03-01 'I Had a Black Dog says with wit, insight, economy and complete understanding what other books take 300 pages to say. Brilliant and indispensable.' - Stephen Fry 'Finally, a book about depression that isn't a prescriptive self-help manual. Johnston's deftly expresses how lonely and isolating depression can be for sufferers. Poignant and humorous in equal measure.' Sunday Times There are many different breeds of Black Dog affecting millions of people from all walks of life. The Black Dog is an equal opportunity mongrel. It was Winston Churchill who popularized the phrase Black Dog to describe the bouts of depression he experienced for much of his life. Matthew Johnstone, a sufferer himself, has written and illustrated this moving and uplifting insight into what it is like to have a Black Dog as a companion and how he learned to tame it and bring it to heel.

The Great Stink of London Stephen Halliday 2001-02-15 In the sweltering summer of 1858 the stink of sewage from the polluted Thames was so offensive that it drove Members of Parliament from the chamber of the House of Commons. Sewage generated by a population of over two million Londoners was pouring into the river and was being carried to and fro by the tides. The Times called the crisis "The Great Stink". Parliament had to act - drastic measures were required to clean the Thames and to improve London's primitive system of sanitation. The great engineer entrusted by Parliament with this enormous task was Sir Joseph Bazalgette, and this book is a fascinating account of his life and work. Bazalgette's response to the challenge was to conceive and build the system of intercepting sewers, pumping stations and treatment works that serves London to this day. In the process he cleansed the River Thames of the capital's sewage and helped to banish cholera, which in the mid-nineteenth century carried off over 40,000 Londoners. But this successful scheme was only one element in Bazalgette's wider contribution to the development of the Victorian capital. He also reclaimed land from the Thames to construct the Victoria, Albert and Chelsea Embankments, built bridges across the Thames at Putney, Battersea and Hammersmith, and created many notable new thoroughfares including Charing Cross Road, Northumberland Avenue and Shaftesbury Avenue. Stephen Halliday's enthralling social and personal history gives a vivid insight into Bazalgette's achievements and the era in which he worked and lived. The author traces the origins of Bazalgette's family in revolutionary France, the confusing sanitation system that he inherited from medieval and Tudor times and his heroic battle with politicians, bureaucrats and huge engineering problems to transform the face and health of the world's largest city.
