Handbook of Test Development Suzanne Lane 2015-10-08 The second edition of the Handbook of Test Development provides graduate students and professionals with an up-to-date, research-oriented guide to the latest developments in the field. Including thirty-two chapters by well-known scholars and practitioners, it is

divided into five sections, covering the foundations of test development, content definition, item development, test design and form assembly, and the processes of test administration, documentation, and evaluation. Keenly aware of developments in the field since the publication of the first edition, including changes in technology, the evolution of psychometric theory, and the increased demands for effective tests via educational policy, the editors of this edition include new chapters on assessing noncognitive skills, measuring growth and learning progressions, automated item generation and test assembly, and computerized scoring of constructed responses. The volume also includes expanded coverage of performance testing, validity, fairness, and numerous other topics. Edited by Suzanne Lane, Mark R. Raymond, and Thomas M. Haladyna, *The Handbook of Test Development*, 2nd edition, is based on the revised Standards for Educational and Psychological Testing, and is appropriate for graduate courses and seminars that deal with test development and usage, professional testing services and credentialing agencies, state and local boards of education, and academic libraries serving these groups.

***Designing the Nation's Capital: The 1901 Plan for Washington, DC* Sue A. Kohler 2006 Seven essays on various aspects of the Park Commission Plan (popularly known as the McMillan Plan), by authors well-known in their fields. Many illustrations, some taken from the Park Commission's Report (1902) and color illustrations of the remaining water color renderings owned by the Commission. With this current volume, the Commission has chosen to explore its origins with a look into the events and people leading up to the creation of the Senate Park (McMillan) Commission in 1901 and the resulting plan for the redevelopment of the city. It commemorates the recent centennial of the Park Commission Plan as well as bringing to light aspects of and insights into the plan not generally or clearly understood by the public. The plan was and still is a work in progress. Its creation was a lofty endeavor born of the spirit of the times in a political and social climate that seemed to frown on any enterprise that required the spending of public funds or called for a change in the accepted appearance of the Capital. The participants faced formidable obstacles not unlike those that reverberate today whenever a change to the familiar is contemplated. These essays have been compiled to serve the people of Washington and all who find the creation of cities a subject of fascination.**
