Voices of the Oral Deaf Jim Reisler 2015-10-03 The deaf world is a complex one, divided by the allegiance of some to Deaf Culture, which emphasizes communication by sign-language, and by others to oralism, which emphasizes speech as the primary means of communication, and still others to a program called Total Communication, which stresses both signing and speaking. Today, more and more deaf people, especially children, are choosing oralism because it helps them fit into mainstream society better. This work presents interviews with fourteen extraordinary oral deaf role models from diverse backgrounds and professions. Wall Street banker Ralph Marra, paralegal Kristin Buehl, 1984 Olympic gold medalist Jeff Float, percussionist Evelyn Glennie, engineer George Oberlander, university mathematics professor Dr. David James, law professor Bonnie Poitras Tucker, executive Carolyn Ginsburg, foundation head Mildred Oberkotter, architect Tom Fields, accountant and institute executive director Ken Levinson, finance manager Michael Janger, school administrator Kathleen Suffridge Treni, and teacher Karen Kirby tell of their experiences and stories, discuss what helped and what hindered them, and offer advice to parents of deaf children. Instructors considering this book for use in a course may request an examination copy here.

Resumes for Scientific and Technical Careers 1994 This practical, up-to-date guide identifies the essential ingredients of a successful resume for the scientific and technical professional.

CV Resume Writing Techniques Get Hired Immediately: A comprehensive guide to write an eye-catching CV that gives lots of job interviews, with many employment getting tips Smit Chacha I was 21 when I finished my University degree in Computer Visualization and Games. I was a freshman with no work experience in this field. I was looking for jobs in computer field, mainly games development, web design or 3d animation. It was hard to get 1 interview; I remember those days when I use to apply for dozens of jobs every day. I have been to countless online job recruiters (Reed, Monster, Indeed, etc.) Also, in many Job Center Plus and career advisors such as: Seetec, YMCA and many others. Been in many libraries not for reading books but to apply and to get advice in how to get in to the job market. It was taught but eventually I landed in my desired field. Every time I visited the above places my CV was rewritten countless times, until I found how to write a perfect CV from employers' point of view. This took a lot of patients and hard work but eventually I started to get dozens of interviews. I found the secret of writing an interview winning CV. Every time I used to apply for just a few jobs and would get 1 to 3 interviews a week. And this is what I want you to archive. I want you to get job interviews, I want you to learn how to write an interview winning CV. A CV that is written from employers' point of view. In this book titled "CV Resume Writing Techniques Get Hired Immediately" you will learn all the CV writing techniques that will guarantee you an interview. Plus, many interview winning techniques that you should know such as: how to prepare for an interview, how to do research before an interview, most common questions at an interview and how to answer them. After reading this book you will be able to write your own CV from employers' point of view that will give you multiple job interviews a week. Results may vary; however, this book is based on my experience in how I got multiple interviews by learning how to write a perfect CV. I also share with you on this book several ways in how to apply for jobs. Not only online but also by writing a cover letter and sending speculative letters.

Real-resumes for Engineering Jobs Anne McKinney 2004 Civil engineers, mechanical engineers, structural engineers, marine engineers, chemical engineers, systems engineers, and engineering support personnel have a lot in common when they want to create a resume, and this book shows resumes and cover letters of individuals who want to work in the field. For those who seek federal employment, there's a special section showing how to create federal resumes and government applications. Since many technical types aren't writers, this comes as a special gift: select a winning format, plug in your background specs, and away you go. It's that easy—with REAL RESUMES in hand. - The Midwest Book Review1-885288-42-5
