The Cognitive Life of Things Lambros Malafouris 2010 "Things have a social life. They also lead cognitive lives, working subtly in our minds. But just how is it that human thought has become so deeply involved in and expressed through material things? There is today a wide recognition that material culture regulates and shapes the ways in which people perceive, think and act. But just how does that work? This is one of the most challenging research topics for the archaeology and anthropology of human cognition. The understanding of the working of past and present material culture - its cognitive efficacy - is becoming a key issue in the cognitive and social sciences more widely. This volume, with innovative case studies ranging from prehistory to the present, seeks to establish a cross-disciplinary framework and to set out future directions for research. Its aim is to redress the balance of the cognitive equation by at last bringing materiality firmly into the cognitive fold. But how can we integrate artefacts - material culture - into existing theories of human cognition? How do we understand the significant role of the human use of the things we have ourselves created in the development of human intelligence? The distinguished contributors here argue that the boundaries of the mind must now be understood as extending beyond the individual and to include the world of the artefact if we are fully to grasp how interactions among people, things, space and time have come, over thousands of years, to shape the transformations in human cognition that have made us what we are."--Publisher's description.

Disobedient Teaching Welby Ings 2017 This book is about disobedience. Positive disobedience. Disobedience as a kind of professional behaviour. It shows how teachers can survive and even influence an education system that does staggering damage to potential. More importantly it is an arm around the shoulder of the disaffected teachers who transform people's lives, not by climbing promotion ladders but by operating at the grassroots. Disobedient Teaching tells stories from the chalk face. Some are funny and some are heartbreaking, but they all happen in New Zealand schools. This book says you can reform things in a system that has become obsessed with assessment and tick-box reporting. It shows how the essence of what makes a great teacher is the ability to change educational practices that have been shaped by anxiety, ritual and convention. Disobedient Teaching argues the transformative power of teachers who think and act.

Manifesta 10 Kasper König 2014 The State Hermitage Museum in St. Petersburg was selected by the Manifesta Foundation to host its tenth biennial because of its critical, intellectual and historical relationship with East and West Europe: a uniting principal that is also central to Manifesta. For the first time, Manifesta is hosted by a museum, uniting the State Hermitage Museum's 250th anniversary and Manifesta's twentieth anniversary as a nomadic biennial of contemporary art. Manifesta 10 (28 June - 31 October 2014) considers the historical perspective of St. Petersburg's view to the West, and its extensive relationship with Europe at large. Over 50 artists were invited by curator Kasper König to illustrate their own sections in the catalogue.

Protection of Civilians Professor of International Law and International Constitutional Studies Marc Weller 2016-05-17 The protection of civilians is a highly topical issue at the forefront of international discourse, and has taken a prominent role in many international deployments. It has been at the center of debates on the NATO intervention in Libya, UN deployments in Darfur, South Sudan, and the Democratic Republic of the Congo, and on the failures of the international community in Sri Lanka and Syria. Various described as a moral responsibility, a legal obligation, a mandated peacekeeping task, and the culmination of humanitarian activity, it has become a high-profile concern of governments, international organizations, and civil society, and a central issue in international peace and security. This book offers a multidisciplinary treatment of this important topic, harnessing perspectives from international law and international relations, traversing academia and practice. Moving from the historical and philosophical development of the civilian protection concept, through relevant bodies of international law and normative underpinnings, and on to politics and practice, the volume presents coherent cross-cutting analysis of the realities of conflict and diplomacy. In doing so, it engages a series of current debates, including on the role of politics in what has often been characterized as a humanitarian endeavor, and the challenges and impacts of the use of force. The work brings together a wide array of eminent academics and respected practitioners, incorporating contributions from legal scholars and ethicists, political commentators, diplomats, UN officials, military commanders, development experts and humanitarian aid workers. As the most comprehensive publication on the subject, this will be a first port of call for anyone studying or working towards a better protection of civilians in conflict.

Draft Energy Bill Great Britain: Department of Energy and Climate Change 2012-05-22 The Government is committed to moving to a secure, safe, affordable and low-carbon energy system. This will mean achieving its climate change and renewables targets, including a 34 per cent reduction in CO2 emissions by 2020 (relative to 1990); at least an 80 per cent reduction by 2050; and by 2020 ensuring that 15 per cent of energy comes from renewable sources. This transition will require major investment in modern technologies: to renovate buildings; to provide for the electrification of much of our heating, industry and transport; and to move to cleaner power generation. It will also require major changes in the way energy is used by individuals, industry and the public sector. At the core of the Bill is the need to ensure that, as older power plants are taken offline and electricity demand continues to increase, the UK remains able to generate enough energy to meet its needs. The Energy Bill will: implement the electricity market reforms set out in the white paper 'Planning our electric future ...' (Cm. 8099, ISBN 9780101809924); clarify the role of the regulator, Ofgem; establish an Office for Nuclear Regulation; make changes to the offshore transmission regulatory framework; and make provisions for the potential sale of Government Pipeline and Storage System. This document contains a description of the Bill's aims, the draft Bill and explanatory notes, together with a summary impact assessment.

Unfinished Business: Democracy in Namibia Bryan M. Sims 2012 Idasa's Democracy Index - initially developed for South Africa - is being expanded into Southern Africa in an effort to broaden the capacity of individuals and organisations monitoring and supporting democratic governance efforts in the region. This inaugural Democracy Index for Namibia is intended to set a benchmark for democracy to be measured against. The tool assesses the country's depth of democracy through five focus areas: participation, elections, accountability, political rights, and human dignity. The research relies on expert analysis to answer a set of questions that interrogate how closely, in practice, democracy meets the broad ideal of self-representative government. More specifically, to what extent can citizens control elected officials and government appointees who make decisions about public affairs? And how equal are citizens to one another in this accountability process? The purpose of the scores is to assist citizens in making their own judgements, based on the information made available, to stimulate national debate and to provide democracy promoters with a tool for identifying issues and needs that can be addressed by education, advocacy, training, institution building and policy revision.

Summary Execution Michael Withey 2018-02-20 "An incredible true story that reads like an international crime thriller."—Steve Jackson, New York Times bestselling author On June 1, 1981, two young activists, Silme Domingo and Gene Viernes, were murdered in Seattle in what was made to appear like a gang slaying. But the victims' families and friends suspected they were considered a threat to the dictatorship of Philippines dictator Ferdinand Marcos and his regime's relationship to the United States. In Summary Execution, attorney and author Michael Withey describes his ten-year battle for justice for Domingo and Viernes that he fought because "They killed my friends." Follow along as he embarks on a long and dangerous investigation and into the courtroom to obtain convictions of three hitmen, and then prove in U.S. federal court that Marcos was behind the assassinations. If so, it would be the first time in U.S. history that a foreign head of state would be held liable for the murder of American citizens on U.S. soil. However, to accomplish this Withey and his legal team, working with the victims' families and friends, would have to overcome numerous obstacles including exposing the perjured eyewitness testimony of an FBI informant, uncovering the brutal murder of an accomplice who was being sought to turn state's evidence, and working around the failure by local authorities to prosecute the Marcos operative who planned the murders. "Remarkable . . . The story has so many twists—as well as amazing turns—that prove the point that conspiracy theories aren't necessarily fiction."—Eric Nalder, Pulitzer Prize-winning investigative journalist

A Grammar of Epic Sanskrit Thomas Oberlies 2003-01-01 The two great epics of (old) India, the Mahabharata and the Ramayana, are written in a language, which differs from so-called classical Sanskrit in many details. Both texts still are of an enormous importance in India and other countries. Because of this, a grammar describing all the different characteristics of epic Sanskrit has been missed until now. The Grammar of Epic Sanskrit will now close this gap.

Directions in Tropical Agroforestry Research American Society of Agronomy 1998-03-31 The volume contains 10 state-of-the-art reviews of developments in specific areas of tropical agroforestry research during the past two decades, prepared by acknowledged world leaders in the respective topics, following their presentations at a one-day symposium held in connection with the annual meetings of the tri-societies of American Society of Agronomy, Crop Science Society of America, and Soil Science Society of America in November 1996. Each paper synthesizes the results of research, summarizes the current state of knowledge, identifies knowledge gaps, and outlines the directions that research should take in the years ahead. Taken together, these papers provide insight into the accomplishments in agroforestry research so far and our current level of understanding. As such, the volume will be of interest to professionals and students alike, not

only in agroforestry, but in all land-use disciplines.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Japanese Cinema Goes Global Yoshiharu Tezuka 2011-11-01 Japan's film industry has gone through dramatic changes in recent decades, as international consumer forces and transnational talent have brought unprecedented engagement with global trends. With careful research and also unique first-person observations drawn from years of working within the international industry of Japanese film, the author aims to examine how different generations of Japanese filmmakers engaged and interacted with the structural opportunities and limitations posed by external forces, and how their subjectivity has been shaped by their transnational experiences and has changed as a result. Having been through the globalization of the last part of the twentieth century, are Japanese themselves and overseas consumers of Japanese culture really becoming more cosmopolitan? If so, what does it mean for Japan's national culture and the traditional sense of national belonging among Japanese people?

Graves' Orbitopathy Wilmar M. Wiersinga 2010-01-01 The significant progress in the understanding of the pathogenesis and the treatment of Graves' orbitopathy (GO) has warranted a second edition of this book within three years of the first. Now also fully incorporated is the EUGOGO consensus statement on management of GO, which since has been accepted worldwide as a useful guideline. Furthermore all chapters have been thoroughly updated. Subjects covered include the pathology of GO and the controversial views on its pathogenesis; assessment of changes using reliable measuring techniques; medical management of GO including established and alternative treatment options; technical explanations and illustrations of various surgical procedures and finally, the molecular, immunologic, and clinical aspects of this complex disorder. Two new chapters have been added: one describing the socioeconomic impact of the disease and the other outlining the Amsterdam Declaration on Graves' Orbitopathy. The successful question-and-answer format facilitates its use as a reference guide for medical practitioners and surgeons working in the fields of ophthalmology, internal medicine, endocrinology, pediatrics, immunology, as well as otorhinolaryngology.

AIDS Law Margaret C. Jasper 2008 Since its first appearance in the United States in the early 1980's, AIDS has become a sweeping epidemic. At the end of 2005, the Center for Disease Control estimated that 437,982 people were living with AIDS in the United States and that number continues to rise. Medical and political communities have tirelessly struggled to develop policy that will both protect the general public from the spread of the disease as well as safeguard the rights and autonomy of those afflicted. In this third edition of AIDS and the Law, Margaret Jasper discusses the legalities associated with this disease, including an individual's rights regarding employment, education, health care, and insurance under various federal, state and local laws. She sets forth an overview of the medical aspects of AIDS, the testing procedures, and some of the common treatments currently available as well as briefly outlines its background and history. In addition, she tackles controversy over mandatory testing, reporting and partnership notification and also the discrimination sufferers' face. AIDS and the Law compiles necessary information for someone who wants to learn more about the legal issues surrounding this epidemic.

Exporting Good Governance Jennifer Welsh 2007-10-26 Can good governance be exported? International development assistance is more frequently being applied to strengthening governance in developing countries, and in Exporting Good Governance: Temptations and Challenges in Canada's Aid Program, the editors bring together diverse perspectives to investigate whether aid for good governance works. The first section of the book outlines the changing face of international development assistance and ideas of good governance. The second section analyzes six nations: three are countries to which Canada has devoted a significant portion of its aid efforts over the past five to ten years: Ghana, Vietnam, and Bangladesh. Two are newer and more complex "fragile states," where Canada has engaged: Haiti and Afghanistan. These five are then compared with Mauritius, which has enjoyed relatively good governance. The final section looks at challenges and new directions for Canada's development policy. Co-published with the Centre for International Governance Innovation

Climate Change in Asia and the Pacific Venkatachalam Anbumozhi 2012-06-13 Climate change is one of the most significant challenges to global economic development. Left unchecked, continued global warming could cause worldwide social and environmental disruption. The Asia and Pacific region is more vulnerable to climate change risks than other regions due to its dependence on the natural resources and agriculture sectors. Densely populated coastal areas, weak institutions, and the poverty of a considerable proportion of its population add to the susceptibility of this region. Adaptation—making adjustments in natural or human systems in response to actual or expected climate stimuli—becomes a key strategy for sustaining economic growth. This volume examines the framework conditions for integrating climate change adaptation measures into agriculture, water, and natural resources management activities for the Asia and Pacific region. Based on the review of country experiences, the book describes key dimensions, suggests interventions for further exploration, and serves as a basis for planning and mainstreaming climate change adaptation into sectoral planning

Persistence of Race Nina G. Jablonski 2020-02-25 This is the third and final group of essays emerging from the discussions of the Effects of Race Project at the

Stellenbosch Institute for Advanced Study (STIAS) that occurred in 2016 and 2017. The authors consider the biological and social understandings of race, and how new information from both the biological and social sciences is changing our perspective on the nature of the human condition, including the association of biological and social phenomena with "race". They also look at global events or movements which influence these processes in South Africa and the costs of a racialised world order to humans and humanity. Phenomena are examined through the lenses of many disciplines: sociology, history, geography, anthropology and writing.

World Development Indicators 2009 World Bank 2009-01-01 Looking for accurate, up-to-date data on development issues? 'World Development Indicators' is the World Bank's premier annual compilation of data about development. This indispensable statistical reference allows you to consult over 900 indicators for some 150 economies and 14 country groups in more than 80 tables. It provides a current overview of the most recent data available as well as important regional data and income group analysis in six thematic sections: World View, People, Environment, Economy, States and Markets, and Global Links. World Development Indicators 2009 presents the most current and accurate development data on both a national level and aggregated globally. It allows you to monitor the progress made toward meeting the Millennium Development Goals endorsed by the United Nations and its member countries, the World Bank, and a host of partner organizations. These goals, which focus on development and the elimination of poverty, serve as the agenda for international development efforts.
