CIA's Analysis of the Soviet Union, 1947-1991 United States. Central Intelligence Agency 2001 Provides key documents used to analyze and explain the intentions and capability of the Soviet Union to US policymakers. PEFA, Public Financial Management, and Good Governance Jens Kromann Kristensen 2019-11-24 This project, based on the Public Expenditure and Financial Accountability (PEFA) data set, researched how PEFA can be used to shape policy development in public financial management (PFM) and other major relevant policy areas such as anticorruption, revenue mobilization, political economy analysis, and fragile states. The report explores what shapes the PFM system in low- and middle-income countries by examining the relationship between political institutions and the quality of the PFM system. Although the report finds some evidence that multiple political parties in control of the legislature is associated with better PFM performance, the report finds the need to further refine and test the theories on the relationship between political institutions and PFM. The report addresses the question of the outcomes of PFM systems, distinguishing between fragile and nonfragile states. It finds that better PFM performance is associated with more reliable budgets in terms of expenditure composition in fragile states, but not aggregate budget credibility. Moreover, in contrast to existing studies, it finds no evidence that PFM quality matters for deficit and debt ratios, irrespective of whether a country is fragile or not. The report also explores the relationship between perceptions of corruption and PFM performance. It finds strong evidence of a relationship between better PFM performance and improvements in perceptions of corruption. It also finds that PFM reforms associated with better controls have a stronger relationship with improvements in perceptions of corruption compared to PFM reforms associated with more transparency. The last chapter looks at the relationship between PEFA indicators for revenue administration and domestic resource mobilization. It focuses on the credible use of penalties for noncompliance as a proxy for the type of political commitment required to improve tax performance. The analysis shows that countries that credibly enforce penalties for noncompliance collect more taxes on average.

You Can't Fight Tanks with Bayonets Allison B. Gilmore 2000-03-01 A startling omission from the extensive literature on the Pacific events of World War II is an analysis of Allied psychological operations. Allison B. Gilmore makes a strong case for the importance of psychological warfare in this theater, countering the usual view of fanatical resistance by Japanese units. Gilmore marshals evidence that Japanese military indoctrination did not produce soldiers who were invulnerable to demoralization and the survival instinct.
