Library Media Connection 2004

Learning with Computers II (Level Orange, Grade 8) H. Albert Napier 2012-03-26 The new second edition LEARNING WITH COMPUTERS I (Level Green, Grade 7) is a revision of the first edition project-based text to cover Microsoft Office 2007 and 2010. There is also a companion text, LEARNING WITH COMPUTERS II (Level Orange, Grade 8). This series for middle school students delivers a strong foundation in keyboarding and computer applications. In this project based text, students are introduced to the Explorers Club where four young members of the club -- Luis, Ray, Julie, and Lin -- guide students on Microsoft Office explorations. Along the way, each student keeps a personal journal about their explorations. The text offers multiple opportunities to reinforce and maintain basic keyboarding, word processing, spreadsheet, presentation, database, graphics, and Internet skills. Students are also introduced to new grade-level appropriate computer skills based on the National Educational Technology Standards (NETS). Additionally, the text emphasizes research, reading, and writing activities relevant to social studies, science, math, and language arts curriculum. The text for use with Windows applications, is divided into 4 units; Word Processing, Spreadsheets, Presentations (Graphics, Multimedia, and Integration) and Databases. Each unit contains multiple projects for a total of 18 projects per text, plus an introductory project. Each project focuses on a group of grade-level appropriate objectives for particular computer applications. Several hands-on activities within each project are designed around these objectives. This one-semester text can be used as a stand alone or in conjunction with South-Western's MicroType keyboarding software. MicroType is an engaging, easy-to-use program that teaches new-key learning and skill building. Features include 3-D animations, videos, and fun interactive games. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Teaching the Nature of Science Through Process Skills Randy L. Bell 2008 Engage your students with inquiry-based lessons that help them think like scientists! "[This] book...has made such a difference in my teaching of science this school year. I have had some of the most amazing science lessons and activities with my students and I attribute this to what I learned from...[this] book... I have watched my 5th grade students go from being casual observers in science to making some amazing observations that I even missed. We enjoy our class investigations and the students ask for more!" --Alyce F. Surmann, Sembach Middle School "Teachers will relate well to the author's personal stories and specific examples given in the text, especially the ones about events in his own classroom.... like having the grasshoppers escape into the classroom!" --Andrea S. Martine, Director of Curriculum and Instruction, Warrior Run School District With *Teaching the Nature of Science Through Process Skills*, author and science educator Randy Bell uses process skills you'll recognize, such as inference and observation, to promote an understanding of the characteristics of science knowledge. His personal stories, taken from years of teaching, set the stage for a friendly narrative that illuminates these characteristics of scientific knowledge and provides step-by-step guidance for implementing inquiry activities that help children understand such important, yet abstract, concepts. With Randy as your guide, you can better adhere to current science education standards that urge teachers to go beyond teaching science content to teach children about the practice and the nature of science in a way that engages all learners in grades three through eight. Investigate further... More than 50 ideas and activities for teaching the nature of science to help you meet content standards. A comprehensive framework to guide you in integrating the approach across the science curriculum, throughout the school year, and across the grade levels. A goldmine of reproducible resources, such as work sheets, notebook assignments, and more. Assessment guidance that helps you measure your students' nature of science understanding.
