London In The Nineteenth Century Jerry White 2011-06-08 Jerry White's London in the Nineteenth Century is the richest and most absorbing account of the city's greatest century by its leading expert. London in the nineteenth century was the greatest city mankind had ever seen. Its growth was stupendous. Its wealth was dazzling. Its horrors shocked the world. This was the London of Blake, Thackeray and Mayhew, of Nash, Faraday and Disraeli. Most of all it was the London of Dickens. As William Blake put it, London was 'a Human awful wonder of God'. In Jerry White's dazzling history we witness the city's unparalleled metamorphosis over the course of the century through the daily lives of its inhabitants. We see how Londoners worked, played, and adapted to the demands of the metropolis during this century of dizzying change. The result is a panorama teeming with life.

Tunnel Boring Machines: Trends in Design and Construction of Mechanical Tunnelling A. Parallel to the technical development of TBM's towards applications for longer tunnels, running through changing geological conditions, there are needs for the development of lining methods. 'TBM Tunnel Trends' an international lecture serie collection, aims to present the latest scientific and practical state of the art of TBM tunnelling, taking into consideration interactions between machinery and lining. 26 international highly recognized papers.

Micro- and Nanobubbles Hideki Tsuge 2014-08-04 Microbubbles and nanobubbles have several characteristics that are comparable with millimeter- and centimeter-sized bubbles. These characteristics are their small size, which results in large surface area and high bioactivity, low rising velocity, decreased friction drag, high internal pressure, large gas dissolution capacity, negatively charged surface, and ability to be crushed and form free radicals. Microbubbles and nanobubbles have found applications in a variety of fields such as engineering, agriculture, environment, food, and medicine. Microbubbles have been successfully used in aquacultures of oysters in Hiroshima, scallops in Hokkaido, and pearls in Mie Prefecture, Japan. This field has shown a strong potential for growth. This book comprehensively discusses microbubbles and nanobubbles and their application in aquaculture, environment, engineering, medicine, stock raising, agriculture, and marine industry. It presents their potential as a new technology that can be utilized globally.
